

JONES ZYLON

MISSION READY

FAMILY OF PRODUCTS

The logo features a stylized 'JZ' monogram in white, set against a blue circular background. The entire logo is enclosed within a metallic, shield-like frame with a blue and silver border and bolt details.

MISSION OBJECTIVE

YOUR MISSION: Deliver safe meals to special housing units 3 times/day, 365 days/year without fail.

JonesZylon can help you accomplish that mission with our new family of efficient, reliable carts that fulfill 4 vital criteria:

1

MEET HACCP REGULATIONS

You control the environment. Heated transport carts are the best way to ensure that HACCP temperatures are met, especially if serving with extended time from the kitchen. When disruptions happen, leave the cart plugged in and wait it out.

2

INVEST WISELY

You're set for the long-term. Always known for their durability, JonesZylon carts just got better. Removable heaters extend service life by simplifying maintenance and eliminating the possibility of damaging the heater element during washing.

3

SERVE 3 MEALS A DAY, EVERY DAY

You've got backup. Unlike any other meal delivery cart, the JonesZylon's Mission Ready cart system is operational in a snap. No need to wait for repairs when you need critical equipment for immediate objectives. Snap in a spare heating unit and the cart is mission ready.

4

KEEP IT SIMPLE

You don't need training. The Mission Ready cart system with its removable heater technology needs virtually no training. The simple, intuitive design allows you to set the heater in and slam it home. Heaters are interchangeable among the system cabinets. Use a heater from your spare inventory or remove one from equipment not currently in use. To clean the equipment, pop out the heater and power wash or slosh with a bucket of water.

JonesZylon's **Mission Ready** meal carts with removable heaters are your secret weapon to success. Equip yourself with the tools necessary to better accomplish all of your objectives.

Family of Products

READY to move large number of meals to seg unit

Meal Transport Cart | JZH-198 / JZA-198

- Very high capacity. Brings 198 larger (9000 series) seg trays to special housing unit
- Baffle system for superior heat distribution
