

PREMIUM multi-terrain casters

EASIER TO PUSH

The mixture of perfect tread durometer, resiliency, shape and weight capacity give the wheel the ability to roll and maneuver easily.

- « *The unique material formulation stores potential energy and releases kinetic energy to give an extra boost before and during rolling*
- « *The sturdy-yet-lightweight aluminum core won't overheat and won't bog down movement*
- « *Donut shape provides smooth maneuverability*
- « *Expels debris rather than embedding it in the tread*

LONGER LASTING

Designed and built for extreme manufacturing environments.

- « *Higher quality polyurethane for less wear and longer life*
- « *Mechanically and chemically bonded to a light weight, sturdy aluminum core.*
- « *maintenance free double-sealed precision ball bearing*
- « *Kingpinless swivels eliminates #1 cause of caster failure, the kingpin*

OTHER BENEFITS

- Non-marking
- Very quiet, low decibel movement
- Disperses debris
- Grips floor
- Excellent cushioning over cracks

PREMIUM casters are perfect for

- Healthcare
- Heavier (larger) carts
- Routes with incline/decline
- Transported by officers/staff
- Towing applications
- Poor floor surfaces
- Outdoor applications
